

Requirements for presentations at SAAPMB congresses or by representatives of the SAAPMB:

1. Branding and Representation

- **Official SAAPMB Representation:** The official logo of the SAAPMB must be displayed on every slide if the presenter is formally representing the Association.
- **Congress Presentations:** For presentations at the official SAAPMB congress, the specific conference logo (if requested by the Congress organizers), must be present on at least the title slide.

2. Authorship and Contributions

- **Contributor Attribution:** All co-authors who contributed to the scientific work must be clearly listed on the title slide.
- **Funding Acknowledgments:** Any funding sources, grants, or institutional financial support for the study must be explicitly acknowledged on a dedicated slide.

3. Disclosures and Integrity

- **Conflict of Interest Slide:** A dedicated slide detailing disclosures and/or conflicts of interest must be included, ideally immediately following the title slide.
- **Generative AI for Content Creation:** The use of any generative AI tools for the purpose of content creation (such as writing, text editing, or slide generation) must be disclosed. Presenters must include a statement declaring exactly what the AI tool was used for.

Note: This applies strictly to presentation assistance tools and does not refer to machine learning models or algorithms developed as part of the core scientific methodology.

4. Ethical Oversight and Legal Compliance

- **Patient Privacy and POPIA Compliance:** In strict compliance with the Protection of Personal Information Act (POPIA), all clinical data, images, and case studies must be completely anonymized, deidentified or unidentified. No patient identifiers (including names, hospital identification numbers, dates of birth, or other distinct features) may be visible.
- **Ethics Approval:** Notice of formal research ethics committee clearance or waiver including the committee's name, certificate number, and approval date must be explicitly stated on either the opening slides or within the methodology section

5. Intellectual Property and Citations

- **Third-Party Media and Data:** All figures, diagrams, illustrations, or external datasets (including public repositories) that are not the original intellectual property of the presenter, co-authors or institution must be explicitly referenced on the slide where they appear.
- **Prior Publication and Social Media:** Presenters must ensure that any data, figures, or findings previously shared on public platforms or social media do not violate institutional dissemination policies or journal pre-publication embargoes. If the copyright of the material has already been transferred to a publisher or social media platform, a citation is mandatory.
